

Acousti-Mat® Tape

Installation

Unwind adhesive film or tape and apply the adhesive side to the mounting surface. Apply firm pressure. Recommended application temperature to achieve best results is 65 °F (18 °C) or above. Proper bonding may not occur unless adhesive and surface material are both at 65 °F (18 °C).

Note: When applying pressure sensitive adhesive films to any surface, be sure that the surface is free from oil or other surface contaminants such as powder, dust or release agents. Adhesive performance should be carefully checked when used on substrates containing plasticizers.

Storage and Disposal

Shelf life is one year from date of shipment when stored in a cool dry place below 76 °F (24 °C). Rolls should be stored on end. Keep in a dry, cool place. Maxxon Acousti-Mat Perm-Rated Tape is not considered hazardous per US-GHS requirements and may be disposed of with day-to-day construction materials.

Warranty and Tech Services

Contact Maxxon before your project for complete warranty information. Technical performance verification and service is available through Maxxon Corporation or Maxxon Regional Representatives throughout North America.
