

Acoustic Door Threshold

Description

Our acoustic door threshold, commonly called a saddle, are used to help reinforce soundproof door assemblies to reduce gaps beneath the door.

These sound rated thresholds should be combined with our automatic door bottoms for to create soundproof door assemblies. The thresholds are available in an aluminum finish and may be field cut to fit the existing door opening.

Technical Characteristics

Size: 36" standard, or custom as required

Finish: Aluminum

Type: 164, 564, 565

#164

#564

#565
