

AcustiForm Sound Baffle

Description

Constructed with a rigid plastic perimeter, fabric wrapped AcustiForm Sound Baffles can contain either a reflective or absorptive acoustical core depending on your noise control needs.

Choose from your choice of over 30 Guilford of Maine Anchorage acoustic fabric colors and 23 different shapes and custom size options.

Looking for innovation in design? Using high resolution printing, we can print any image file or design onto various baffle shapes for a custom appearance. Baffles can be updated regularly with various printed fabrics to maintain a fresh seasonal appearance.
