

AlphaMidnight Black Acoustic Ceiling Tile

Description

Our AlphaMidnight Black Acoustic Ceiling Tile is a very popular ceiling tile for use in low light applications like theaters, music studios and home theaters. The black facing provides low light reflectivity and makes the ceiling disappear.

These ceiling tiles are a 1" or 2" thick fiberglass covered with a black matte facing. The acoustic ceiling tiles offer high sound absorption ratings, starting with an NRC 1.05 for one inch thick.

The AlphaMidnight™ Ceiling Tiles come in standard sizes of 2' x 2' and 2' x 4' and standard thicknesses of 1" and 2" for use in a standard 15/16" suspended grid system.

Technical Characteristics

Size	23¾" x 23¾" 23¾" x 47¾"
