

AlphaSorb® Sound Diffuser

Description

Our AlphaSorb® Sound Diffuser scatters or disperses acoustic energy through out a given space. The multiple facets and angles of the AlphaSorb® Sound Diffuser redirects and redistributes sound waves throughout the room, helping to eliminate hot and dead-spots while maintaining a true “live” sound. AlphaSorb® Sound Diffusers answer both your acoustical and aesthetic needs with their strong sound diffusion capabilities and elegant appearance. They are 2" thick, are available in 2' x 2', 2' x 4' and 4' x 4' sizes and a variety of colors.

The AlphaSorb® Sound Diffusers allow you to create an effective sound control treatment that is distinctly designed for your environment. You can also mix them seamlessly into a room with 2" thick AlphaSorb® Acoustic Panels, allowing for both sound diffusion and absorption within the room, while maintaining an uninterrupted look and professional style. The Diffusers are lightweight and easily installed.

Note: Finished AlphaSorb® Diffusers DO NOT have a cutout. The cutout in the product image is to display the diffuser substrate only!

Use AlphaSorb® Sound Diffusers in private facilities like home theaters, music listening rooms, recording studios and rehearsal spaces.
