

AudioSeal® Lag Tape

Description

Our AudioSeal® Lag Tape is primarily used to seal and join the joints of AudioSeal® Duct and Pipe Wrap and AudioSeal® Duct and Pipe Lag. Lag tape easily conforms to irregular surfaces and excels in demanding conditions.

The lag tape is a UV resistant polypropylene tape coated with an Acrylic adhesive. It can be used in temperatures ranging from -35°F to 260°F, and will not delaminate over time. The tape also excels in both high heat and humidity conditions.

Features

- Excels in demanding conditions
- Conforms well to irregular surfaces
- Easy application to fibrous and sheet metal duct
- Provides a vapor seal for aluminum faced insulation

Use lag tap to seal joints and seams of pipe and duct insulation and wraps.

Technical Characteristics

Size:	3" wide x 150' long roll
Thickness:	3.0 mils
Color::	Silver
Materials:	Polypropylene tape coated with an Acrylic adhesive
Service Temp:	-35° F to 260° F (300° intermittent)

Revised: 2025-04-30
