

# PrivacyShield® AQFA-10EXT Exterior Soundproofing Blanket

## Description

The PrivacyShield® AQFA-10EXT Exterior Soundproofing Blanket is used to add sound absorption to exterior applications to reduce reverberation and echo. The blankets are quilted fiberglass absorbers (QFA) that feature UV and tear resistant exterior grade vinyl coated polyester quilted to 2-inch thick fiberglass batting, sewn with a Gore® Tenara® thread.

The blanket can be installed on existing solid surface. The quilted fiberglass absorber blanket reduces the reflection of sound waves by adding soft, porous, open-celled materials to an otherwise less absorbent surface. These blankets are often used to reduce sound from outdoor HVAC equipment, dust collectors or other equipment and can be installed on wood fencing, or existing walls.

## Technical Characteristics

<b>Size:</b>	4' x 8'   Up to 4' x 25'
<b>Thickness:</b>	2" (nominal)
<b>Construction:</b>	Vinyl coated fiberglass
<b>Pattern:</b>	Diamond Stitching (default) Vertical Stitching (custom)
<b>Color:</b>	Grey   Black   Tan   Off-White
<b>Edges:</b>	Panels: Bound Rolls: Bound   Unbound
<b>Mounting:</b>	Grommets   No Grommets or as specified
<b>Weight:</b>	0.45 lbs / ft <sup>2</sup>
<b>Temp Range:</b>	-40° F to 180° F
