

VersiFold Room Divider

Description

Our VersiFold Room Divider is a folding acoustical divider that dampens sound and creates separate spaces that sound great. Each partition panel uses a fully-tackable, acoustical ribbed fabric over a heavy foam core. Set up the VersiFold in a zig-zag pattern, or combine with the optional VersiFoot accessories to create either “L” or “C” shapes. Each unit has side magnets that allow multiple VersiFolds or VersiPanels to be interconnected. Unlike our other room dividers, these acoustical partitions meet the floor directly from end to end, keeping sound confined from other areas. Several units may be linked together with the built-in magnetic end pieces. Use the VersiFold as an acoustical studio partition, or as a room divider to manage space more effectively.

Technical Characteristics

Size:	96" wide x 78" high
Thickness:	2¼"
Material:	Fabric-wrapped LDPE foam core
Finish:	Acoustically Ribbed Fabric
Color:	Black Blue Grey
Fire Rating:	Class 1 per ASTM E84
Mounting:	Freestanding with optional VersiFoot Partition Stabilizers

Sound Absorbing Performance

125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz	NRC
0.18	0.32	0.48	0.89	1.01	0.99	0.65

Suggested Application for VersiFoot Stabilizers
