

# VersiPanel Partition Wall

## Description

Our VersiPanel Partition Wall modular system is a configurable sound absorbing acoustic divider that easily stores away when not in use. Due to its superior sound-dampening capabilities and attractive appearance, the VersiPanel is a popular for use as a studio partition or office divider. Unlike other partition walls, the VersiPanel meets the floor directly from end to end, limiting the passage of sound.

The VersiPanel is made up of several smaller linear panels. This allows you to arrange the partition in a serpentine “S” shape. By adding a couple of optional VersiFoot accessories, you can create “C” or “L” shapes, often seen in recording or testing spaces. Link several units together with the attached magnetic end pieces to create a larger partition.

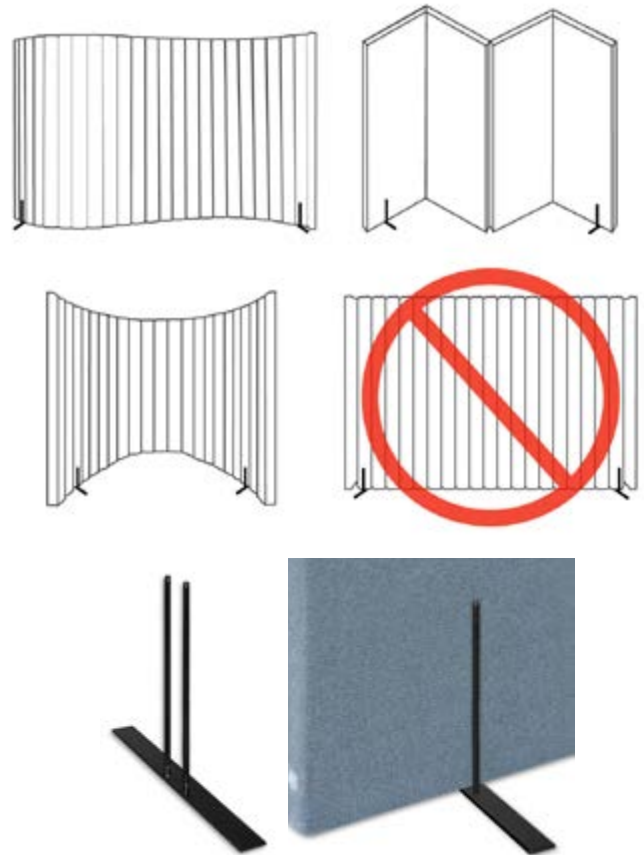

## Technical Characteristics

<b>Size:</b>	96" wide x 78" high
<b>Thickness:</b>	2¼"
<b>Material:</b>	Fabric-wrapped LDPE foam core
<b>Finish:</b>	Acoustically Ribbed Fabric
<b>Color:</b>	Black   Blue   Grey
<b>Fire Rating:</b>	Class 1 per ASTM E84
<b>Mounting:</b>	Freestanding with optional VersiFoot Partition Stabilizers

## Sound Absorbing Performance

125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz	NRC
0.18	0.32	0.48	0.89	1.01	0.99	0.65

Suggested Application for VersiFoot Stabilizers
